BACK END DEVELOPMENT	|	Python , Dot Net core, C#
FRONT END DEVELOPMENT	|	Javascript , Bootstrap , HTML , CSS , Dart
DataBase	|	MongoDB , SQL
TV APP DEVELOPMENT|	|	Brightscript

Projects

- **Students Grade Prediction System**

  A web application for grade prediction of students. Made using python, django, Mongo DB, html , css , javascript , react , bootstrap. It was my FYP.

- **Flight Reservation System**

  The Flight Reservation System is a web application built using ASP.NET MVC. It simulates an online reservation platform, allowing users to perform the following tasks:Search for Flights,Booking Seats Technologies Used:
  - ASP.NET MVC: Framework for building the web application.
  - SQL Server: Local database for storing flight and reservation data.

- **Banking Application**

  I developed a banking mobile application using Flutter and Dart. The app comprises five modules, allowing users to add payments, view their credit card details, and utilize barcode scanning functionality

Experience

Paf Hospital Islamabad

(Flutter Developer **)**

(March,2024 - Present)

Project : Banking Application

Invotyx Islamabad

(Junior Software Developer **)**

(Dec,2023 - Feb,2024)

Project : TikTok Application

Education

Bachelors in Computer Science from **NUML** University Islamabad (February 2020 – January 2024)
CGPA : 3.17

Intermediate from **Fazaia** Inter College Jinnah Camp, Rawalpindi (2017 - 2019)

Matric from **Fazaia** Inter College Jinnah Camp, Rawalpindi
